

Brema's MUSTER range of modular ice flaker heads produces subzero flat ice flakes which automatically drop into a separate Brema storage bin.

The Brema M800A is a modular ice flaking machine that produces 900kg of flat ice flakes per 24 hours and is designed to fit on top of a range of Brema storage bins with differing capacities from 500kg to 1200kg.

At between  $-5^{\circ}\text{C}$  and  $-10^{\circ}\text{C}$ , MUSTER flaked ice is ideal for processing, transporting and preserving foods. The ice is longlasting, has a fast and efficient refrigerating effect and is easy to handle and dose.
