

The Australian owned and designed Trueheat RC Series of Gas Cooking Equipment has been developed to meet the operation needs and highest standards demanded by chefs and restaurant owners within a commercial kitchen.

The RCS86 is a gas heated, heavy duty salamander with a single shelf and 3 height settings. Two powerful 13MJ/hr high speed gas burners radiate intense heat, which seals in the natural flavours to leave a grilled appearance on steaks, chicken, seafood and vegetables.

RCS86 pictured mounted on optional IFB9-SAL stand
