

BTH/ 60-60 s/s Cutlery Trolley pre-soaking

Make

Manufacturer: HUPFER®
Model: BTH / 60 - 60
Article-no.: 0161750

Dimensions

Width: 755 mm
Depth: 800 mm
Height: 730 mm

Execution

Structure

Solid self supporting and hygienic structure made from stainless steel, material 1.4301.

Characteristics

Heated cutlery dip trolley with seamlessly and jointlessly welded, completely isolated deep drawn tank, 600 x 600 x 300 mm, for soaking cutlery parts. The trolley can be easily moved under working tables and conveyor belts, even in combination with cutlery lifting magnets; with screen bottom, 600 x 600 mm, to protect the bottom of the tank against direct contact with insert baskets. The tank can be emptied free of residues due to the special inclination of the tank bottom. The actual condition of the outlet valve (1"), e.g. whether it is open or closed, is easily visible, and it is assured against unintended opening.

Heating

Heating by means of a stainless steel tube heating. Operation by means of a ON/OFF-button with integrated control light, infinitely adjustable and ergonomically shaped temperature control at the front side. Visible from a distance. Inherently stable spiral cable with angle plug and conic blind socket at the operating side.

Ergonomics

Two ergonomically shaped pushing handles attached to the operating side with integrated bumpers protect against injuries at the hands and damages at the appliance. 4 bumpers at the chassis as protection against collision.

Chassis

4 swivel castors, two of them with brake, castors made from corrosion resistant plastics, maintenance free, with threat protection, precision ball bearing, Ø 125 mm, according to DIN 18867 part 8.
