

The Brema ID70 is a bench top ice dispensing machine that will connect to either a Brema VM350 7g modular head ice maker or TM250A Pebble modular head ice maker. The ID70 delivers ice by pushing a cup, jug or glass against the stainless steel lever. The dispenser avoids human contact with the ice.

Designed to be installed on a bench or on a floor mounted stand, the ID70 is perfect for hotels, hospitals, workplace canteens and anywhere that optimum sanitation is of fundamental importance.

STANDARD FEATURES
