- ✓ Standard with 10 program memory
- ✓ Standard Soft Air
- ✓ Free options: Cut-off, Double or Wide Seal
- ✓ Flat working plate
- ✓ Standard Time control

2 years parts and 2 years labour.
On site warranty.

Busch pump
All Purevac machines are equipped with a Busch vacuum pump.

OPTIONAL

NEW: Automatic lid

Purevac has integrated its automatic lid in the Polar double chamber models 2-85 and 2-95. This advanced option includes a foot pedal to enable semi-automatic operation. Perfect for the industrial packaging of both food and non-food products. The automatic lid is only available on new models.

IMPROVED ERGONOMICS

Operators experience a huge ergonomic advantage with the automatic lid. Less weight has to be lifted, which improves the working conditions of individual operators and reduces sick leave.

OPERATIONAL ADVANTAGE

From an operational perspective, preset packaging cycle times guarantee a constant and high production output. The automatic lid contributes to a more productive workforce.

GUARANTEED SAFETY

The automatic lid is equipped with a sensor that activates the emergency stop in case of entrapment. This guarantees the highest protection levels during the complete vacuum packaging process.

The automatic lid significantly improves every packaging process. Operators work faster and with less effort.
